 - Chapter 3, 125
 - Chapter 4, 184
 - Chapter 5, 264
 - Chapter 6, 328
 - Chapter 7, 387
 - Chapter 8, 475
 - Chapter 9, 592
- assessment, 557
- assuming the opponent's rationality, 370, 372
- assumption
 - assuming a set of choices, 327
 - assuming the opponent's rationality, 370, 372
 - common assumption of rationality, 380
 - k-fold assumption of rationality, 379
 - weakly assuming the opponent's rationality, 414
- auction
 - first-price, 360, 408
 - second-price, 286

- backward dominance procedure, 475
- backward induction, 78
 - procedure, 508, 566
 - strategy, 508
- backward robust solution, 561
- backwards order of elimination, 492
- backwards rationalizability procedure, 560
- Bayesian updating, 447, 518
- belief, 3
 - about the opponents' choices, 18, 32, 33
 - beliefs diagram, 20
 - conditional, 439, 444
 - conditional belief vector, 446
 - conditionally independent, 156
 - correct, 195
 - correlated, 34, 156
 - extended beliefs diagram, 99
 - first order belief, 86, 97
 - hierarchy, 86
 - simple, 166, 176
 - in the opponents' future rationality, 453, 458
 - in the opponents' rationality, 46, 54, 112
 - independent, 154, 156
 - initial belief in the opponents' rationality, 661
 - k-fold belief in rationality, 113
 - k-th order belief, 86
 - Kreps-Wilson, 556
 - lexicographic, 231, 233
 - cautious, 235
 - expected utility, 237
 - optimal choice, 239
 - p-belief, 298
 - point belief, 158
 - primary, 230
 - primary belief in opponent's rationality, 246
 - probabilistic, 23
 - probability 1 belief, 158
 - projective, 201
 - revision, 428
 - second order belief, 86, 97
 - secondary, 230

- strong belief in the opponents'
 - rationality, 573, 575
 - third order belief, 86, 97
- best rationalization principle, 668
- best response set, 149, 158
- best-response correspondence, 224
- burning-money game, 671
- cautious
 - lexicographic belief, 235
 - type, 243
- cautious reasoning, 231
- choice
 - admissible, 297
 - irrational, 20
 - opponents' choice-combination, 33
 - optimal, 36
 - under lexicographic belief, 239
 - optimal choice for a type, 109
 - permissible, 298
 - randomized, 37, 41
 - rational, 19, 36
 - rational choice under belief in the opponents' rationality, 54
 - set of choices, 32
 - strictly dominated, 20, 42
 - weakly dominated, 261
- common assumption of rationality, 380
- common belief
 - in future rationality, 459
 - in rationality, 86, 113
 - with simple belief hierarchy, 181, 184
- common certainty of rationality at the beginning of the game, 568
- common full belief
 - in "caution and respect of preferences", 309
 - in "primary belief in rationality", 248
 - in "respect of preferences", 308
 - in caution, 247
 - in caution and "primary belief in rationality", 249
- common initial belief in rationality, 568
- common knowledge, 154
- common prior, 157
- common strong belief in rationality, 583
- competition between firms, 78
- consistent pair of choice sets, 302
- correlated equilibrium, 158
- correspondence, 203
 - best-response, 224
- CURB set, 159
- decision maker
 - under uncertainty, 80
- decision problem at an information set, 473
- Dekel-Fudenberg procedure, 264, 299
- elaboration of a game, 299
- elimination
 - iterated elimination of strictly dominated choices, 125
 - iterated elimination of weakly dominated choices, 299, 387
 - order, 134, 267, 392, 484, 610
 - two-fold elimination of strictly dominated choices, 59
- epistemic game theory, 4
- epistemic model, 105, 108
 - canonical, 161
 - complete, 161, 416
 - continuous, 161, 418
 - for dynamic games, 449
 - complete, 558
 - terminal, 558
 - terminal, 159
 - universal, 161
 - with lexicographic beliefs, 241
- existence
 - common assumption of rationality, 391
 - common belief in future rationality, 468
 - common belief in rationality, 122
 - with simple belief hierarchy, 182
 - common full belief in "caution and primary belief in rationality", 259
 - common full belief in "caution and respect of preferences", 317
 - common strong belief in rationality, 594
 - Nash equilibrium, 181

- explicable equilibrium, 670
- extensive form rationalizability, 665
- fixed point, 203
- forward induction, 668
- forward induction
 - equilibrium, 669
- fully permissible choice sets, 303
- game, 17
 - anti-coordination, 82
 - burning-money, 671
 - dynamic, 17, 425
 - multi-stage, 555
 - of chess, 78
 - recreational, 78
 - reduced, 57, 59
 - repeated, 553
 - static, 17, 35
 - strictly competitive, 78
 - with incomplete information, 12, 151
 - with observed past choices, 491
 - with perfect information, 500
 - generic, 567
 - zero-sum, 76
- game theory, 3
- graphical method
 - Chapter 2, 56
 - Chapter 3, 117
- history
 - non-terminal, 429, 436
 - terminal, 429, 436
- infinitely more likely, 234
- information set, 432, 436
 - following another information set, 456
 - simultaneous information sets, 456
 - weakly following another
 - information set, 457
- intuitive criterion, 669
- iterated addition of preference
 - restrictions, 328
- iterated conditional dominance
 - procedure, 592
- Kakutani's fixed point theorem, 204
- knowledge, 81
- Kripke structure, 154
- likelihood ordering, 327
- lottery, 79
- Nash choice, 183
- Nash equilibrium, 181
 - sufficient conditions
 - more than two players, 201
 - two-player games, 200
- one-deviation property, 570
- one-person perspective, 7, 218
- opponents, 32
- optimality principle
 - Chapter 3, 135
 - Chapter 5, 276
 - Chapter 7, 394
 - Chapter 8, 530
 - Chapter 9, 630
- order of addition, 337
- order of elimination, 134, 267, 392, 484, 610
- perfect equilibrium, 292, 300
- perfect recall, 435, 438
