

*Competition Policy And Regulation.*

*Recent Developments in China, the US and Europe*

*Michael Faure , Xinzhu Zhang*

*Abstract*

*This unique book considers competition policy and regulation in light of the recent introduction of the anti-monopoly law in China. It addresses the relevance of competition policy for China from a broad theoretical and practical perspective, bringing together lawyers and economists from China, Europe and the US to provide an integrated law and economics approach.*

*Given that the development of the Chinese anti-monopoly law in China was heavily reliant on a comparative approach, the contributors analyse how its text and practice actually compare to European and US legislation. The first cases in which Chinese anti-monopoly law were applied are explored, and both competition law and competition policy are discussed in detail. Topics include: industrial and professional regulation and their relationship to competition law, merger control, substantive competition law issues, cartels, and abuse of dominance and predation.*

*This book will prove a fascinating read for competition lawyers, economists with a special interest in regulation and competition, and for practitioners concerned with competition policy and regulation.*
